AGENDA

11:15 a.m. – 11:45 a.m.

Panel: **Electrification of Transportation Fleets**

Focus: Fleet conversion to electric vehicles (EVs) for transit, corporate, school, and government fleets presents opportunities for emissions reduction, but public resistance and funding limitations remain key challenges. Concerns include high upfront costs, range anxiety, limited charging infrastructure, and cultural preference for gasoline-powered vehicles. Addressing these barriers requires a combination of direct pay incentives, public education, and innovative financing, alongside federal and state investments in infrastructure through programs like NEVI and CFI. Overcoming resistance and funding gaps will be critical to achieving widespread adoption and ensuring the long-term success of EV initiatives.

Moderator: Rebecca Roose, Infrastructure Advisor at the Office of the Governor

Panelists:

- Jerry Valdez, Executive Director at NMDOT
- Mike Bartholomew, City Transit Director at City of Las Cruces
- Robin Shishido, Deputy Director, Highways Division for the State of Hawaii
